

I hope it hasn't escaped your radar but just in case it has, there are BT cabinets that have been upgraded to enable access to fibre broadband in your parish.

Mortimer – cabinets P1 and P2 now serve over 1000 premises

This will not provide total coverage for your parish but with further deployment expected next year and additional funding secured, broadband access is definitely set to improve.

Further details can be found on the project website – www.superfastberkshire.org.uk. For example, click on 'target cabinets' to see the latest update to the roll out schedule on the Latest progress page - <http://www.superfastberkshire.org.uk/index.aspx?articleid=29445>

Individuals can check on which cabinet they are connected to by using the BT Wholesale checker - <https://www.btwholesale.com/includes/adsl/main.html>

Those wishing to upgrade their broadband should check the available options from a broadband comparison websites and place their order. You do not have to use BT, there are usually a number of options. Please note that your broadband speeds will not happen automatically.

Please ensure the message is passed on to members of your community so that residents and businesses are aware of this opportunity.
