

Community Centre Apron and Path

The Parish Council are pleased to announce that the area in front of the Community Centre has been upgraded and a drain has been installed. This means there should no longer be the need to navigate a puddle on entering the building after prolonged rain.

In addition, a footpath has been built to join the area at the front of the Community Centre with the paving slabs at the side. This too should help prevent users of the building getting wet and muddy feet as they open and lock up the Centre.
