

ASWC Session The Library Victoria Road Wednesday 20th August 2025

GB and MD Eastwards 07:44 to 08:40

Speed	Num	%
25 to 30	79	76.7%
31 to 35	20	19.4%
36 & over	4	3.9%
Total	103	

Camera records processed images (plate read) and some no plate when it can't read the plate. In this session processed was 58 and no plate 45 images. Not ideal but probably due to overcast conditions and tree cover. Nearly all the no plate could be read successfully. Only one was over 36 so this was added to the processed. 4 reported. Highest 38 mph. Total number is sum of both.

ASWC Session Pillbox Thursday 21st August 2025

AM and MD Eastwards 07:43 to 08:52

Speed	Num	%
25 to 30	169	75.1%
31 to 35	46	20.4%
36 & over	10	4.4%
Total	225	

Here processed had 189 images, no plate 36. Most of those could be read but about 8 were when the photo was too late so get half the plate or the side of the vehicle. Think these are the second vehicle of two close together. But only one of the no plate was an offender (at 41 mph) and this was successfully added to processed. 10 reported. Percentages similar at both sites
