

# Infrastructure & Services

## No digital infrastructure assessment

**The templates below are example statements to help guide your objection—please adapt them and express the points in your own words**

- ‘The Plan does not assess broadband or mobile coverage, despite these being critical to modern life. Mortimer experiences patchy service in places, and further development without upgrades would worsen this.’
- ‘There is no evidence that digital infrastructure providers have been engaged or that capacity exists to support 350 additional homes. This omission is contrary to national digital connectivity policy.’
- ‘Given the shift towards remote working, poor digital infrastructure undermines sustainability and economic resilience. The Plan provides no analysis to ensure adequate provision.’
- ‘Digital connectivity is a core component of infrastructure planning. The absence of assessment makes this allocation unjustified and incomplete.’
- ‘Without commitments to fibre connectivity and mobile network improvements, the development risks creating digital disadvantage for new and existing residents.’
