

# Infrastructure & Services

No plan for GP/healthcare capacity.

**The templates below are example statements to help guide your objection—please adapt them and express the points in your own words**

- ‘The Plan does not assess whether local GPs or health services can accommodate the population increase. Current waiting times are already stretched, and adding 350 homes without a healthcare strategy is unsound.’
- ‘Without a healthcare capacity assessment or confirmed mitigation, this proposal fails to meet the justified and effective tests of soundness. Healthcare is a fundamental service that cannot be overlooked.’
- ‘Mortimer’s nearest GP surgeries are running at high utilisation, with limited physical space for expansion. The absence of any evidence or strategy for additional healthcare provision is a major flaw.’
- ‘A sustainable community must have appropriate access to medical services. This allocation provides no evidence that such access can be maintained or improved, making it inconsistent with national policy.’
- Healthcare planning cannot be left until later phases—capacity issues must be understood now. The lack of assessment makes the proposal premature and unsound.
