

Environment and Climate

No plan to reduce emissions or manage climate impacts

The templates below are example statements to help guide your objection—please adapt them and express the points in your own words

- ‘The Plan includes no measures for reducing carbon emissions from the development, despite climate mitigation being a statutory planning requirement.’
- ‘There is no evidence of renewable energy integration, sustainable transport plans, or low-carbon design. This contradicts national and local climate commitments.’
- ‘A development of this size should demonstrate how it will minimise emissions, but the proposal is silent on this issue, making it outdated and unsound.’
- ‘The absence of climate resilience planning—such as shading, water efficiency, or heat-mitigation strategies—shows poor preparation.’
- ‘Climate considerations cannot be deferred; their omission at Regulation 18 stage is a major flaw.’
